

# FULTON COUNTY TRIBUNE

ESTABLISHED IN 1882  
KENTON A. WEBB - PUBLISHER  
Entered at the Post Office in Wauson, Ohio  
as Second Class Matter

**RATES OF SUBSCRIPTION**  
One year \$3.00  
Six months \$1.50  
Three months .75  
Single copies 10c  
Subscribers wishing the paper discontinued  
should write to that effect and pay up  
all their arrears. If this is not done, it  
is assumed that the subscriber wishes the  
paper continued and intends to pay when  
billed.

Seems mighty good to see the brick  
in the street pavements again. Some  
old bricks—and we are also thank-  
ful that some of the "same old  
bricks" are still here to walk on the  
pavement bricks.

Not a robin but an eagle has come  
to Marblehead and the residents of  
that village are caring for it. The  
bird is said to be so tame that it al-  
lows persons to handle it. Must be  
the original American Eagle.

Speaking of robins; how many have  
you seen since ground hog day. One  
of our neighbors told us the other day  
that he had seen one, but all the rob-  
ins we have seen this year were spar-  
rows. Spring is coming but we don't  
look for it to arrive much before  
March 21st.

General Joffre, Chief of the French  
army, is very sanguine in his prediction of  
final victory for the troops of France.  
We wish the "final" would come pre-  
tily soon, of course it is not for us to  
say any thing about who we wish  
may have the victory. The world has  
had enough of war to last it forever.

A Pittsburgh firm refused to bid on  
a contract for steel shells to be used  
in the European war because they  
were unwilling to help in any way to  
prolong the war and they believe that  
so long as the munitions of war can  
be obtained the war will be continued.  
We honor this firm for having the  
courage of their convictions.

Germany has announced that she  
will consider the waters surrounding  
Great Britain and Ireland as a war  
zone and will prey on shipping by sea  
and air. Great Britain's reply is a  
prohibition against all foodstuffs de-  
signed for Germany. And such is war!  
Kill, starve, maim, waste and de-  
vaste; leave the weak and aged, the  
women and children to suffer the  
sequences and bear the burdens! Can  
it be justified?

**Alas... Justice.**

If you have no section harrow, then  
sell your shotgun and buy one. We  
are fond of hunting ourselves, but a  
farmer who is too poor to own a har-  
row, or a lawyer who is too poor to  
buy a book, is certainly not in a fi-  
nancial condition to possess the im-  
plements of a sportsman. Feel yourself  
for your right with fortune, and get  
a harrow.

**To Clean Smoked Paper.**

Writing out a piece of soft flannel in  
water to which a little kerosene has  
been added. The flannel must be  
dampened, not wet, and the oil thor-  
oughly mixed with water. Wipe the  
smoked surface with the moistened  
flannel, and then lightly and quickly  
with soft dry linen. Should one ap-  
plication be insufficient to remove the  
smoke, repeat the process, using clean  
flannel each time.

**Strife Made in Surgery.**

Thanks to the assiduous study and  
persistent experiment of medical sci-  
entists, surgical science has reached  
a level where some delicate operations  
upon its limits. It has, next to the  
laboratory, made a new era of ex-  
perimental medicine and research among  
the mightiest excellencies of a marvelous  
age. Sufferers whose desperate plight  
was once judged hopeless have the  
greatest reason to rejoice over the vic-  
tories of surgical research and experi-  
ment.

### CURIOS FROM SOUTH POLE

Geologists and Students of World  
Physics Welcome Collection Re-  
cently Received in England.

Representative selection from the  
various objects brought home by the  
scientific staff attached to the Scott  
Antarctic expedition is now on ex-  
hibition at the British Natural History  
Museum, South Kensington. The ob-  
jects include the rock fragments  
brought back to within 11 miles of  
One Ton depot by Dr. Wilson. These  
fragments are from Buckley Island, or  
Mount Buckley, which appears out of  
the ice cap where the glacier begins  
to descend toward the barrier ice.  
This "island" as it were parts the  
stream of ice. The fragments tell  
us of warm weather conditions, of  
Devonian fishes which swam gaily in  
the waters of a remote period when  
the polar area was far different from  
what it is now. These fragments are  
of the highest importance to geolo-  
gists and students of world physics.  
Among other interesting objects is  
the skin of a young Weddell seal. The  
fur is of an attractive light brown  
color. The birds brought home by the  
expedition are not yet stuffed. One  
is a very fine emperor penguin, whose  
breast feathers glisten under the elec-  
tric light. A gray-headed mollymawk  
is another fine bird. The only known  
insect (wingless) proper to the Ant-  
arctic is also shown. There are two  
sponges from the ice seas of Antarc-  
tica.

**Not Sam's Fault.**  
Sam Snedeker, the commissary man,  
and held in the community to be a  
good churchman, annoyed the minister  
extremely by getting up and walking  
out of the church while the sermon  
was in progress. The preacher spoke  
to Sam about it.  
"It isn't my fault, doc," Sam pro-  
tested. "It's a sort of affliction I got."  
The preacher told Sam he'd better  
see the camp doctor. A few days later  
the preacher met the doctor.  
"Did Sam Snedeker come to you  
for advice?" asked the preacher.  
"Yes," said the doctor, "but I told  
Sam I couldn't do anything for him."  
"What was Sam's affliction?"  
"Affliction! He didn't say anything  
about that. Sam said he'd been trou-  
bling you by walking in his sleep."—  
New York Post.

**Berlin Firemen's Water-Jackets.**  
In Berlin the firemen wear water-  
jackets with a double skin, which they  
are able to fill with water from the  
hose. If the space between the layers  
becomes overfilled the water escapes  
through a valve at the top of the hel-  
met, and flows down over the fireman  
like a cascade, protecting him doubly.

### MILKING MACHINE

**PUBLICITY BREAKS**

**WORLD'S RECORD**

Valuable Lesson in Advertising  
Taught by Hinman Milker

Success.

Dairymen and farmers during the  
last few years have watched very  
carefully the progress made by mil-  
king machines. Those subscribers hereabouts who  
are readers of Kimball's Dairy Farm-  
er have been very much interested in  
reading the history of the remarkable  
progress made during the last six  
years by The Hinman Milking Machine  
company of Oneida, N. Y., in the  
manufacture of milking machines.  
Four pages of the dairy paper have  
been devoted to an illustrated write-  
up and an advertisement on the Hin-  
man Milker in which is explained in  
detail the principles which have in-  
sured their extraordinary success.

It is stated that the Milker was not  
invented for the purpose of market-  
ing as a commercial product but was  
made to lessen labor and reduce the  
cost of producing milk on the Hin-  
man Dairy Farm. The ambition of  
the inventors was to produce a mil-  
ker which would successfully milk  
their herd without the aid of hired  
help. The fact that the machine was  
produced under the exact conditions  
found in the average dairy explains  
its simplicity of construction and ef-  
fectiveness of operation. It appears  
that the drive-rods system is the fea-  
ture enabling the mechanical milker  
to so perfectly imitate the action of  
the calf.

The four-page ad is an innovation  
in that it gives the names and ad-  
dresses of over 600 owners of the  
milking machine. It gives logical rea-  
sons why the milking machine should  
milk one cow at a time with each unit.  
Of course the visible milk flow and  
the rapid pail changing system are  
absolutely essential. The vacuum  
should be in the valve chamber in-  
stead of in the pail and the machine  
should be very simple in construc-  
tion. The Hinman has only two mov-  
ing parts which appeal to every  
dairyman.

There is a great lesson to adver-  
tisers in the four-page Hinman Mil-  
ker advertisement. It is the largest  
ad which has ever appeared in any  
dairy paper of national circulation  
and it is printed in colors and on  
superior paper stock. No product  
however perfect could have attained  
the success of this milking machine  
without publicity. The Messrs. Hin-  
man have been big advertisers in  
newspapers and farm papers ever  
since the machine was invented which  
accounts for the fact that to-day a  
quarter of a million cows are milked  
with their milker. Adv't.

### Farmers' Free Exchange

WANTED—A place to do general  
house work phone 335.

FOR RENT—One half double house  
on West Elm street. R. BRIGGS.

FOR SALE—A few White Wyandotte  
hens. E. H. Jordan. 45-2-p

WANTED—All kinds of poultry,  
will pay 12 1/2c for chickens, Phone 178  
L. Mattison. 45-1

FOR SALE—A typewriter in very  
good condition, cheap. Inquire of  
John C. Omlor. 45-1

FOR SALE—35, pullets. Inquire  
Ray Dinius, Plattston, phone 18 2L  
180, Delta Mutual. 44-2

drove well, wind pump, good build-  
ings, lots of fruit. For price and  
terms write or call on me on the farm  
or Delta phones. R. D.  
Clifton, R. D. 24, Delta, Ohio. 44-2

**FOR SOIL BUILDING.**  
John Bryan of Yellow Springs, Ohio  
is pretty well known among the agri-  
culturists of Ohio for the work he has  
done and the study he has made  
which have been of practical benefit  
to the people of Ohio. Among them  
is his discovery of deposits nearly  
pure carbonate of lime, an invaluable  
element in soil building, scattered over  
the state and waiting to be used in  
building up the soil and increasing the  
fertility of the state. Mr. John Kor-  
jak wrote Mr. Bryan some time since  
making inquiries in regard to this  
matter and received in reply a letter  
from Mr. Bryan from which we gather  
the following:

Mr. Bryan found three million tons  
of nearly pure carbonate of lime on  
his farm in Greene county, fifteen  
years ago, had it analyzed and test-  
ed then proceeded to use it on his  
farm. With it he built a soil on a  
very poor 40 acre field for which he  
paid but \$40.00 per acre at the present  
time that same field is yielding 5 per  
cent. interest on \$3000.00 on each acre  
each year. Mr. Bryan states that this  
carbonate of lime is found below and  
around springs that flow from layers  
of limestone along cliffs and rivers.  
The calcareous sediment held in solu-  
tion in Spring water is precipitated  
and in millions of years accumulates  
from a foot or two thick to from 20  
to 50 feet in thickness, sometimes ex-  
tending over from one to five acres.  
As a rule a little of it heurions or soil-  
diffuses into a superficial layer or shell  
resembling natural limestone, but the  
main quantity of it is granulated  
about the country. The deposits are  
the mound of it forms the top of the  
ground and usually is covered with  
a slight growth of grass or inconsid-  
erable vegetation. Wherever springs  
flow from limestone rocks they will  
contain this calcareous sediment. Mr.  
Bryan writes that he has never  
stopped off in Fulton county, and con-  
sequently cannot speak advisedly in  
regard to such deposits in this county.  
He is of the opinion that the state  
should engage one or more geologists  
to survey and ascertain the extent of  
carbonate of lime, as its value is  
simply incalculable to Agriculture  
and will equal if not surpass the other  
great sources of mineral wealth.  
Found and utilized on the soil it would  
make Ohio the richest state on earth.

**M. E. CHURCH.**

### New Perfection Oil Cook Stoves

Every housewife will appreciate the advantages and  
usefulness of The New Perfection (nick Blue Flame) Oil  
Cook Stoves.

No. 3 Enameled Top. Dimensions—Height 30 inches,  
Top 14x37 1/2. Price \$9.00.

No. 3 with Cabinet. Dimensions—Height 54 inches,  
Top 13x37 1/2 inches. Price \$15.00.

### Clarks Jewell Oil Stoves

A strong stove which will conveniently support the  
heaviest cooking utensils. Plenty of room for a two burn-  
er oven for baking. The top cooking surface on all Clarks  
Jewell Stoves is at the most comfortable working height.  
These stoves are equipped with a short burner which  
brings the flame next to the vessel.

No. 33 Black Japan with shelf; No. 53 Olive Green with  
shelf. Dimensions—Top Width 34 inches, Depth 17 in-  
ches, Height 32 1/2 inches, Shelf 8 inches wide. Price \$14.50.  
No. 33 Black Japan without shelf; No. 53 Olive Green  
without shelf. Dimensions—Top width 34 inches. Depth  
17 inches, Height 32 1/2 inches. Price \$10.50.

## Brigham, Guilford & Co.

DEPARTMENT STORE

### INSANITY.

A few years ago it was generally  
held that the percentage of insanity  
was greater in rural than in urban  
communities. This fact (?) was at-  
tributed to the lack of social condi-  
tions and to the over-worked condi-  
tion of many rural people. The 1910  
census shows that 41 persons in each  
100,000 in rural communities were ad-  
mitted to asylums for the insane and  
that 86 in each 100,000 in urban com-  
munities were admitted to such insti-  
tutions. It is, therefore, the farmers'  
turn to ask the urbanites, "who is  
lony now?"

The 1910 census report also shows  
that the cases of insanity reported in  
institutions have increased 25 per cent  
from 1904 to 1910. The total popu-  
lation increased only 12 per cent. during  
the same period. This shows that the  
insane in asylums increase twice as  
fast as the population. This is  
due partly, at least, to the fact that  
the facilities for the care of the in-  
sane were greater and a larger propor-  
tion of insane persons were in asylums  
in 1910 than in 1904.

### BOX SOCIAL.

There will be a box social and en-  
tertainment at Olive Branch School,  
three miles south of Wauson, Fri-  
day evening, February 26th. Pro-  
ceeds to help purchase library for the  
school. Everybody invited. Ladies  
please bring boxes, gentlemen, cash.  
ORD BURKHOLDER,  
Teacher.

### London Provided With New Seal.

The official seal of the corporation  
of London was formally "broken" re-  
cently and a new one substituted. The  
old one had been in constant use for  
532 years. It had only one predeces-  
sor, which was destroyed in 1381, be-  
cause it was "too small, rude and an-  
cient." The seal, which was used for  
the last time on the 1st, was of sil-  
ver, about the size of a dollar. It is  
much worn and blurred. It probably  
was used 1,600 times annually, or 798,  
000 times altogether.

### Modern Society Arrogance.

Manners seem to be largely a mat-  
ter of individual preference since there  
is so little harmony in opinion. A wo-  
man who condemns praise of a pretty  
gown or becoming hat on the score  
of bad taste will openly criticize her  
neighbor for acts which are not to her  
liking. This is, on the whole, a great  
deal of arrogance shown in setting up  
a standard and expecting the rest of  
humanity to follow it.—Exchange.

### Marry and Get Used to It.

A young lady of my acquaintance  
gets extremely angry at times. She  
will throw knives or anything she can  
get her hands on. She jumps, kicks  
and slams things at a terrific rate.  
What can be done?—Query in Chicago  
Tribune.

## Rheumatism Sufferers Give This A Trial

The Antidote of Uric Acid Found  
Gives Remarkable Results

Immediate relief to rheumatism sufferers and an absolute, quick  
safe cure. This is now assured, for the antidote to uric acid has  
been found. This antidote, moreover, is as safe as the air you  
breathe, yet it destroys every particle of uric acid in the blood and  
in every tissue, joint, muscle and part of the body.

Cases of years standing have been cured with "Rheumatism  
Drops," also kidney trouble of years standing. Remember, it does  
not require more than two bottles to effect a cure, and as a rule  
one bottle is sufficient. Why use plasters and electric pads when  
they merely draw the pain from one place to another? Get a bot-  
tle of Rheumatic Drops and have the disease driven from your  
system.

Guaranteed by Wm. F. Kastner, under the food and drug act,  
June 30, 1906. Serial No. 33420. One bottle of Rheumatic Drops  
will be sent prepaid upon the receipt of \$1.00.
